CAREER OBJECTIVE

Motivated Electronics and Computer Engineering student with a strong foundation in programming, data structures, software development, and problem-solving. Passionate about developing impactful technology solutions while leveraging analytical thinking, leadership, and cross-functional collaboration to drive successful outcomes. Seeking an internship to strengthen technical expertise, contribute to meaningful projects, and grow in a dynamic, innovation-focused environment..

EDUCATION

Thapar Institute of Engineering and Technology (TIET)

Bachelor of Engineering – Electronics and Computer Engineering | Batch: 2024–2028 | 2nd Year

CGPA: 9.00 / 10

TECHNICAL SKILLS

Programming Languages: C, C++, Python, HTML, CSS, Java script

Data & Algorithms: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving

Tools & Technologies: Git, Visual Studio Code, Canva, AutoCad Design Tool, Matlab

Databases: SQL, MySQL, File Management Systems

Areas of Interest: Software Development, Machine Learning, Data Analytics, Web Development

Soft Skills: Leadership, Team Collaboration, Event Management, Analytical Thinking

PROJECTS

Hospital Management System | Python | SQL | File Management

2024

- Designed and developed a fully functional CLI-based hospital management application in Python to manage hospital records.
- Implemented dual data persistence using both file management and SQL databases, enabling reliable storage and retrieval of records.
- Built separate modules for doctor and patient management — supporting add, delete, update, and search operations on each record type.

FPGA-Based Priority Encoder | Verilog HDL | Xilinx Vivado | Spartan-7 FPGA

- Designed an 8-to-8 active-low priority encoder in Verilog with prioritized input encoding and enable control.
- Developed and verified the combinational RTL design through simulation and synthesized it using Xilinx Vivado.
- Implemented the design on a Spartan-7 FPGA board, mapping input/output signals to physical I/O for hardware validation.

Personal Portfolio Website | HTML | CSS | JavaScript | 2026

- Developed a fully responsive personal portfolio website to showcase projects, technical skills, and achievements.
- Implemented interactive UI components, smooth animations, and responsive layouts using HTML, CSS, and JavaScript.
- Optimized the website for performance, accessibility, and cross-device compatibility while following clean code practices.

EXPERIENCE & LEADERSHIP

Core Team Member | Thapar Movie Club

2024 – Present

- Spearheaded planning and execution of club events, coordinating with a team of 20+ members to ensure seamless audience experiences.
- Managed logistics, scheduling, and on-ground coordination for film screenings and cultural activities attended by 500+ students.
- Coordinated between club leadership, volunteers, and event teams to streamline communication and ensure efficient execution under tight timelines.

Event Organising Team Member | CineYouth 2024 & 2025

2024 – 2025

- Contributed to the planning and management of one of the college's flagship cultural fest/film events across two consecutive years.
- Coordinated across cross-functional teams for logistics, audience engagement, and smooth on-ground execution under tight deadlines.
- Developed adaptability and crisis management skills by resolving real-time operational challenges during live events.

RELEVANT COURSEWORK

Programming Fundamentals • Object-Oriented Programming (OOP) • Data Structures & Algorithms • Problem Solving using C/C++ • Python Programming

ADDITIONAL INFORMATION

- Consistent academic performance with a CGPA of 8.75 in Electronics and Computer Engineering.
- Actively building practical skills in DSA, software development, and data analytics through coursework and self-driven projects.
- Proven ability to lead and collaborate in team-based environments through two years of active club and event management.
- Keen to apply programming knowledge and analytical thinking in real-world fintech and technology contexts at American Express.
